Dimensions

Dimensions with Optional Heatsink

Notes: Add “-K” suffix for ordering, heatsink is affixed with thermally dissipative adhesive tape.
See derating graph for temperature performance. Heatsink material is anodized (black) aluminum, adds weight 11g to total mass (56g). Thermal impedance of converter is: without heatsink 9.5°C/W and 8.5°C/W with heatsink.

Derating

Extended temperature performance can be achieved with optional heatsink. (add suffix “-K” to part number).

Input reflected ripple current test circuit

Input reflected ripple current is measured through a source inductor L_{in} (1μH) and a source capacitor C_{in} (22μF, ESR<1.0ohm at 100KHz) at a nominal input and full load

Control ON/OFF pin connection example

Output ripple and noise reduction circuit

It is recommended to use a 1μF ceramic disk capacitor and a 10μF electrolytic capacitor to reduce the ripple and noise.
