Remarks

Not for flush mounting: See installation instructions for inductive sensors with extended range 939229.  
The sensor is functional again after the overload has been eliminated.  
In rare cases, the function of the sensor may be impaired during contact with water  
it is fully functional again after drying  
For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
