Remarks

Order accessories separately.  
For additional information, refer to user's guide.  
Factory default setting for switching output: Normally open.  
Reference object (target): Steel plate, 50 x 50, thickness 0.5 mm, lateral approach.  
The sensor is functional again after the overload has been eliminated.  
Only for applications per NFPA 79 (machines with a supply voltage of maximum 600 V). Use an R/C (CYJV2) cable with suitable properties for attaching the device.  
For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
