DONE LIGHTEN UP PLAN

LIGHT UP THE CITY / LIGHT UP LIFE / LIGHT UP DREAMS

ENTERPRISE CULTURE

► VISION

To be a century-old company , striving to be one of the top three led driver manufacturers.

► BRAND VALUES

Honesty / Practicability / High efficiency / Responsibility

► MISSION

Dedicate to the development of led drivers around the world, to create values for clients, employees, shareholders and society by utilizing our professional skill and high quality service.

► BUSINESS PHILOSOPHY

To be a customer and contributor oriented company, never stop hard working, adhere to self-enhancing.

► MANAGEMENT PHILOSOPHY

Taking responsibility, Improving continuously, Executing systematically, Pursuing excellence.

Enterprise brief introduction

Guangdong DONE Power Technology Co.,Ltd was founded in May 2009. After more than 10 years of development, it has won many honors such as Guangdong Science and Technology Innovation Enterprise, Guangdong High tech Technology Enterprise, Guangdong Engineering Technology Research Center, Zhongshan Engineering Technology Research Center, etc. The company now has more than 38,000 square meters of modern standardized workshops and more than 600 employees.

It is a comprehensive brand enterprise integrating outdoor road lighting led driver, smart lighting led driver, plant lighting, agricultural lighting led driver, super high-power stadium lighting led driver, industrial lighting led driver research and development, manufacturing, sales and service.

We always adhere to the business philosophy of "diligence, perseverance, innovation, integrity, teamwork, and cooperation" core idea of the company. "Customer-centered, providing high-quality services; brand-based strategy, insisting on innovative development" is our quality policy; "providing every customer with more valuable high-power solutions" is our eternal goal. We strive to be the top three led driver manufacturers in the industry.

We know that talents are the first asset and core competitiveness for the development and growth of an enterprise. Since the establishment of the company, it has recruited talents and knowledgeable people to make good use of, and has gathered dozens of intermediate and senior electronic technical engineers with many years of research and development experience in the industry. This has enabled Done power to have strong product development and rapid verification capabilities in led driver research and development. With rich development experience, strong technical strength, rigorous quality management, and scientific product manufacturing in the field of high-power led drivers , Done power has won unanimous praise from customers since it was built.

Since 2011, Done Power has confirmed its branded business route with "DONE Power" as the main carrier. For more than ten years, the company has invested heavily in introducing advanced domestic and foreign R&D technologies, various sophisticated R&D and testing equipment, and established Innovative research center, reliability verification and intermediate technical institutions, so that Done Power has the ability to carry out the simulation test of the entire process of led drivers.

To create high-quality, high-reliability led driver, and to provide the industry with more selective high-power LED drive products is the spirit that Done power always upholds in product research and development. Done has developed technology options and solutions for each product. Design Verification (DVT), Quality Testing (DQT), Product Verification, Raw Material Selection, pilot Production Control, and Mass Production launching follow high standards of refinement and zero defects; the company is developing key components for all products In the process, a full range of application analysis, high and low temperature and its limit test, safety test, EMC test, accelerated aging test, etc. have been carried out to ensure the high reliability and stability of Done products.

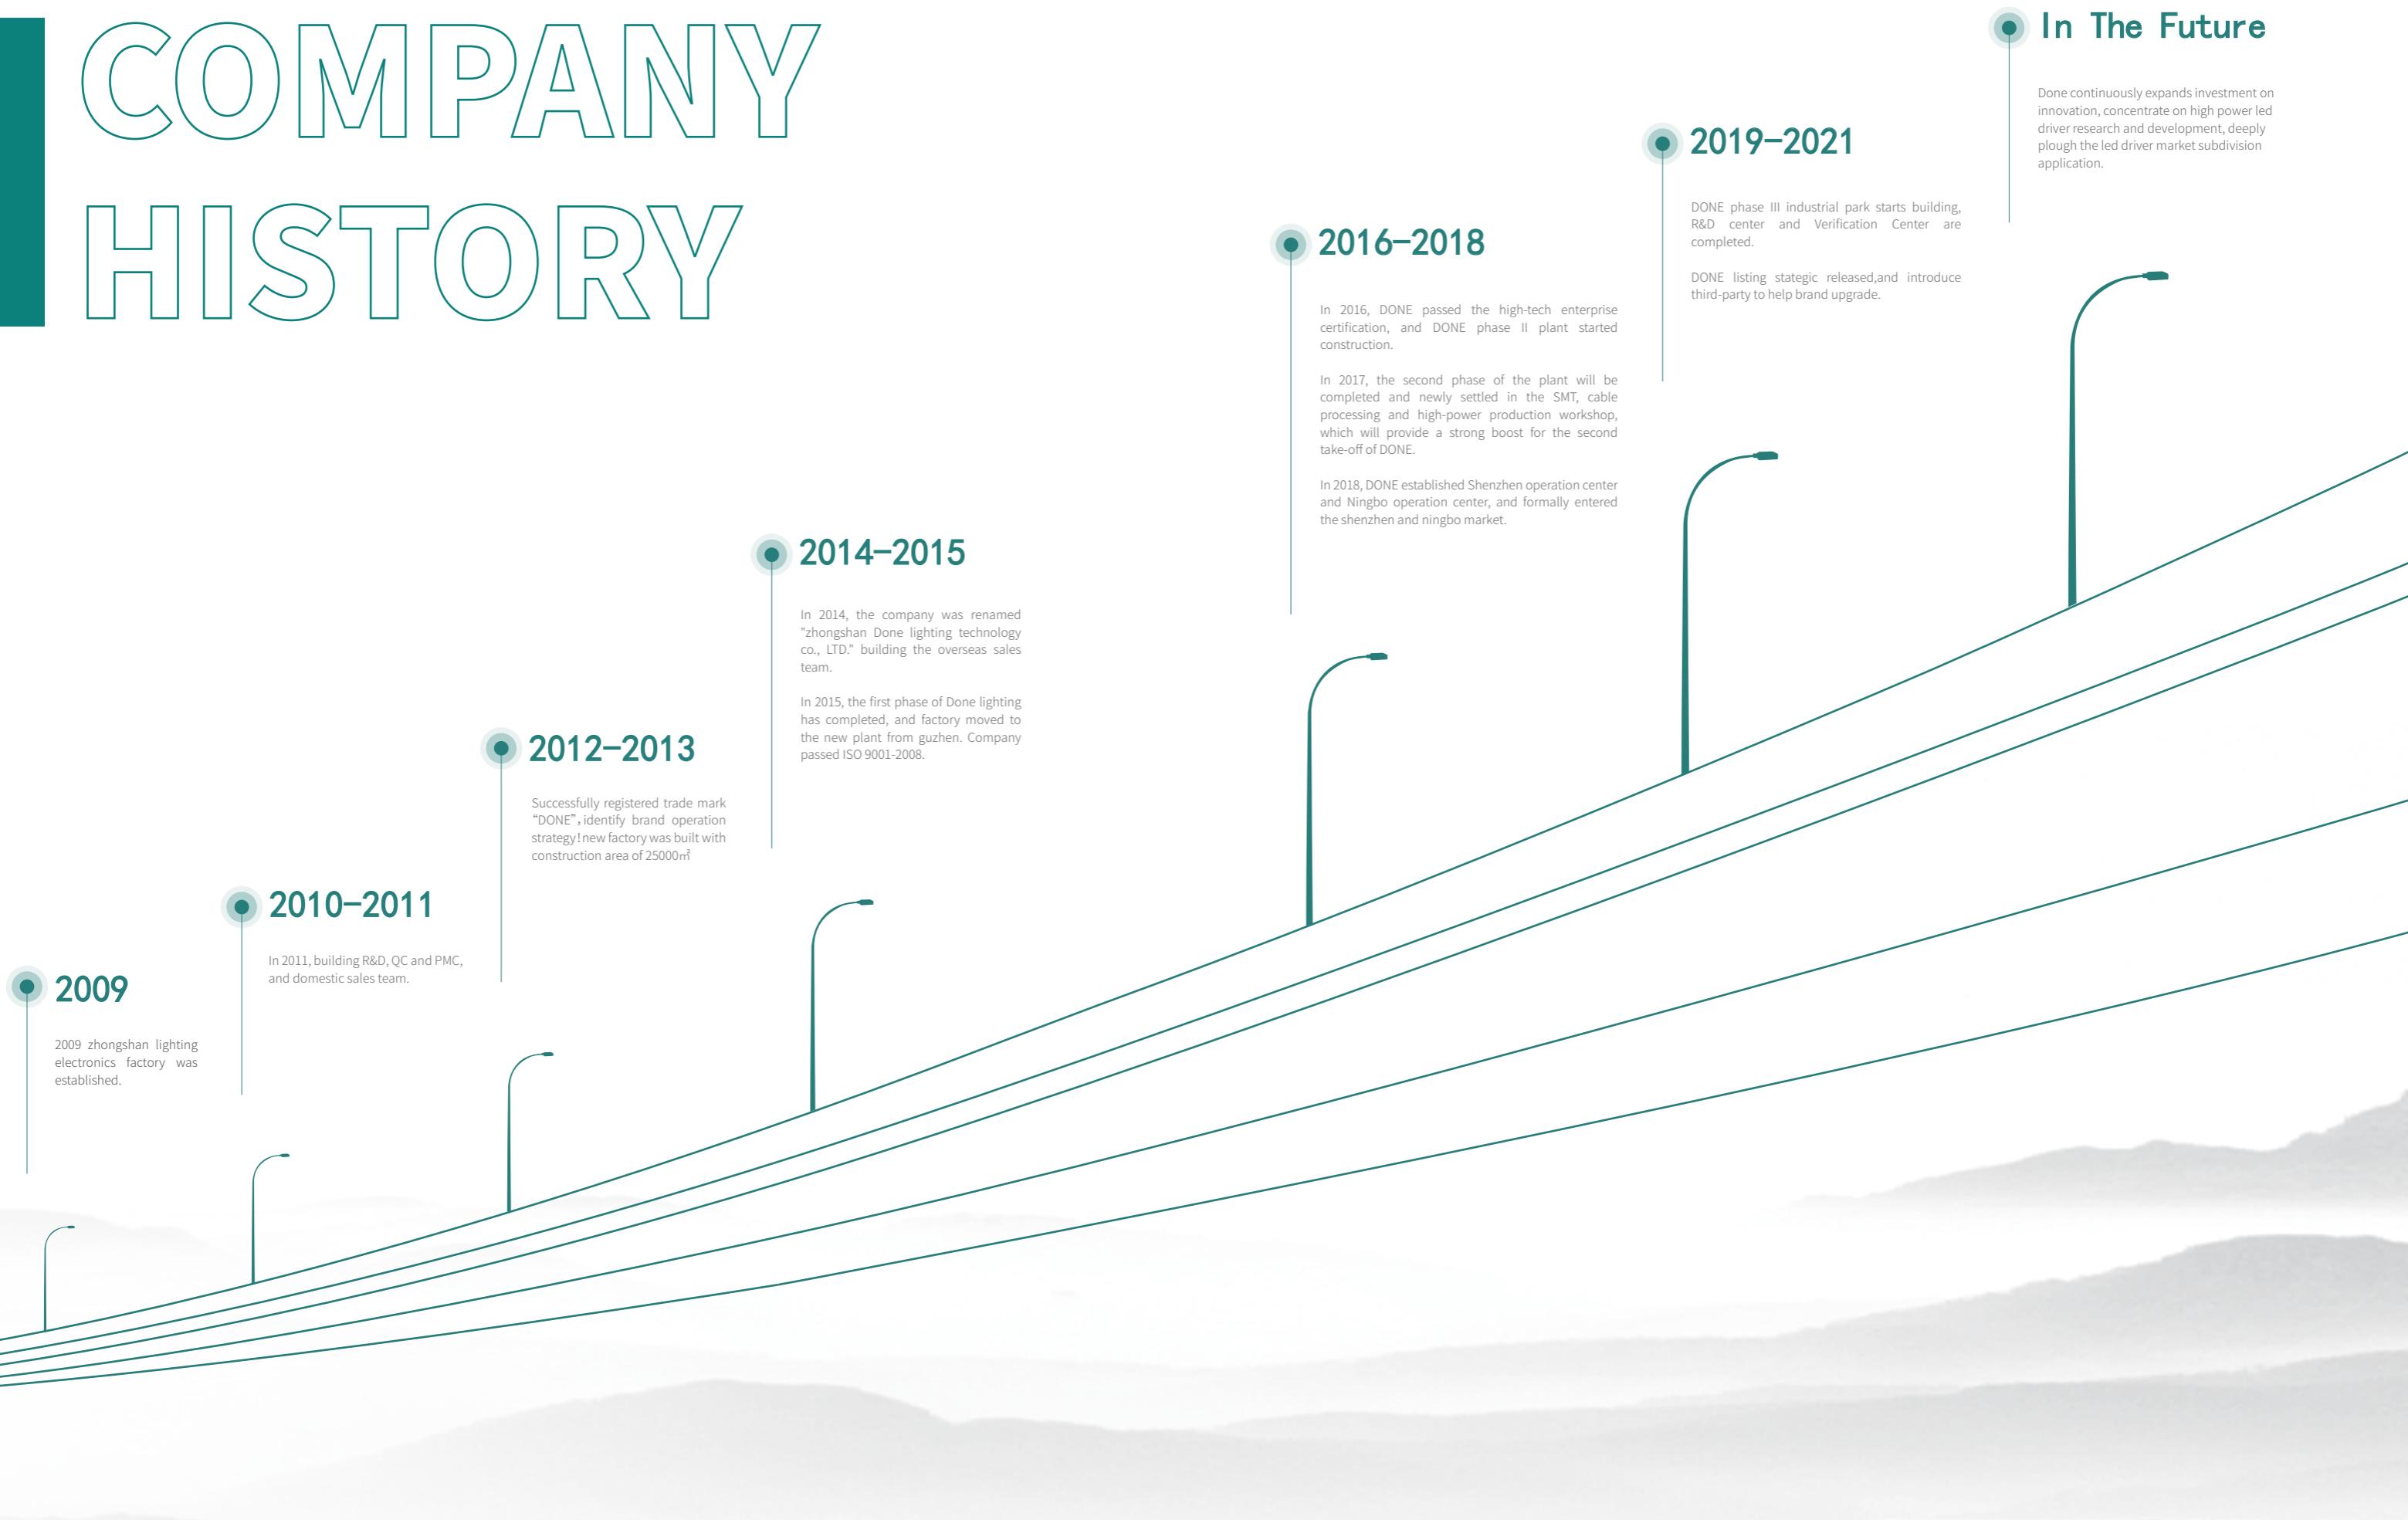

In terms of pilot Production, with fast and strong R&D strength and stable quality, the company's products have successively passed CCC, FCC, CB, PSE, TUV, CE, SAA, UL, C-tick and other domestic and foreign product certifications, which are enable Done Power products go abroad and exported to more than 100 countries in Europe, America, the Middle East, Southeast Asia, Australia, Russia, etc. It has established a favorable guarantee. In terms of terminal applications, Done Power is widely used in various lighting projects, municipal engineering, and industrial Lighting products for factories, mines, stadiums, etc.

In terms of marketing network construction, Done has gradually strengthened the construction of its own channels and distribution channels since 2015, established East China and South China operation centers, set up offices in Ningbo, Changzhou, Shenzhen and other places, and successfully developed Fujian, Yangzhou, Distributors in Wenzhou, Danyang, Hebei, Shenzhen, Chengdu and other regions have successfully developed distributors in Brazil ,Russia, Egypt, Turkey, Vietnam and other countries in abroad, laying a solid foundation for Done Power's global market layout.

Done think highly of the construction of corporate culture, implements a good employee welfare system internally, creates a fair and equitable development platform, carries out various corporate cultural activities, continuously improves the company management system, and strives to learn advanced management experience and philosophy from industry benchmark companies . We sincerely invite people who have dream,aspire,unwilling to be ordinary to join in Done Power , and strive for the "100-year Done Power" corporate goal while achieving their own achievements.

We believe that with the joint efforts of all Done people, the future of Done Power will surely rise like the rising sun and glorious earth!

COMPANY HISTORY

ENTERPRISE SCENE

Focus on high power led drivers

DONE

HONOR

GLOBAL PROFESSIONAL LED DRIVER BRAND FOR OUTDOOR LIGHTING

MXK

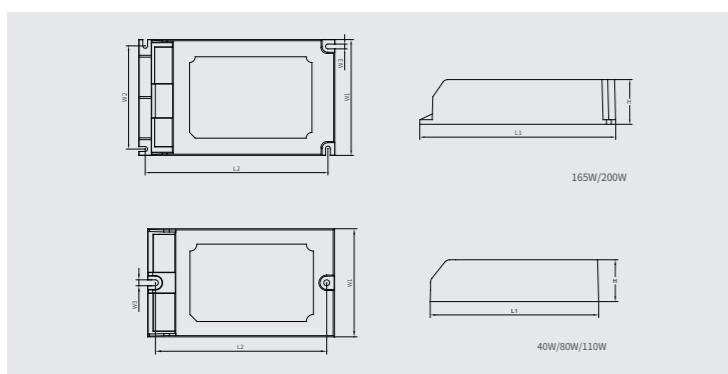

European Standard DALI-D4I dimming LED Driver

PRODUCT FEATURES

CB / CE / CCC / EK / SAA

1. Rated input voltage:200-277V.
2. Provide high output voltage and low current version,Current range:0.7~1.05A .
3. Efficiency up to 94%/High PF \geqslant 0.95/THD \leqslant 7%.
4. Surge protection:6/15KV.
5. Protection level: IP20.
6. SCP/OTP/OVP/UVP protection.
7. Life time>50,000 hrs.And 5 years warranty.

MXG (30-320W)

Universal outdoor waterproof offline programmable LED driver series

MXG
PRODUCT FAMILY SERIES

CE / CCC / SAA / EK / UL / UL LISTED / FCC / CLASS P

PRODUCT FEATURES

1. Rated input voltage:120-277V.
2. Provide standard output voltage version:25-56Vdc,Constant power voltage@36-56Vdc.
3. Provide high output voltage and low current version,Current range:0.7~1.05A.
4. Efficiency up to 94%/High PF \geqslant 0.95/THD \leqslant 10%.
5. Surge protection:6/15KV, Protection level: IP67.
6. SCP/OTP/OVP/OCP/UVP protection.
7. Life time>70,000 hrs.And 5 years warranty.

Type A:adjustable potentiometer version

Type P : programming version

Type X : programming auxiliary output

Type K: Class II version

MUG

Universal High Voltage Input Outdoor LED driver

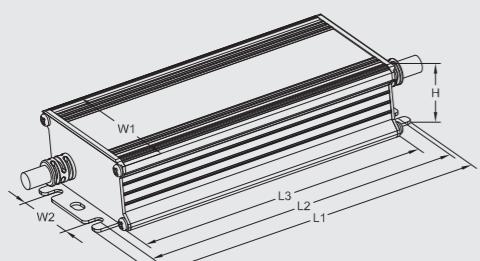

PRODUCT FEATURES

CE / UL / cUL / FCC / CLASS P

1. Rated input voltage: 277~480Vac.
2. Output voltage: 25-56V, constant power voltage: 36-56V.
3. Provide high output voltage and low current version, Current range: 0.7~1.05A.
4. High efficiency up to 93% / Power factor 0.95 / THD < 10%.
5. Surge protection: 6KV/10KV.
6. Protection level: IP67.
7. SCP/OTP/OVP/OUP/UVP protection function.
8. Life time > 50,000 hrs. And 5 years warranty.

Type P: programming version

I-MAS

Indian standard EESL(440V) OVP LED driver series

MAS
PRODUCT FAMILY SERIES

PRODUCT FEATURES

CE / CB /  / 

1. Rated input voltage:200-277Vac.
2. Output voltage:20-38Vdc/32-58Vdc , Constant and adjustable power@32-38Vdc/42-58Vdc.
3. Provide high output voltage and low current version,Current range:0.7~1.05A.
4. Efficiency up to 91%/High PF>0.9/THD<10%@230Vac.
5. India (EESL) version with input over voltage protection can survive input voltage stress of 440Vac for 48 hours.
6. Surge protection:50-75W: 4/6KV, 100W and above: 6/15KV.
7. Protection level: IP67.
8. SCP/OTP/OVP/UVP protection.
9. Life time>50,000 hrs.And 5 years warranty.

MAP

European Standard outdoor road lighting LED Driver series

Type A: adjustable potentiometer version

S-type three in one dimming version

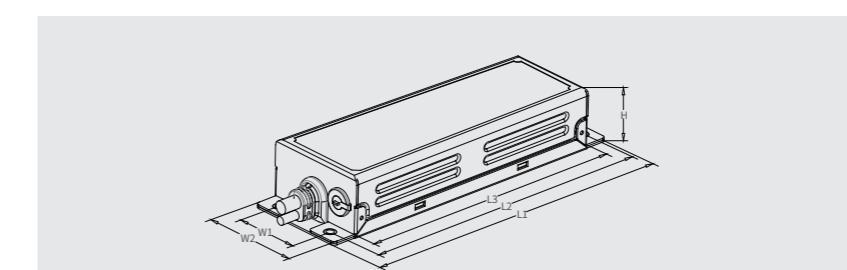

CE / CB /  / SAA /  / 

PRODUCT FEATURES

CE / CB / CCC / SAA / RoHS / RoHS

1. Rated input voltage:100-277Vac,derated protection@100~180Vac.
2. Output voltage:20-38Vdc/32-58Vdc , Constant and adjustable power@32-38Vdc/42-58Vdc.
3. Efficiency up to 92%/High PF>0.95/THD<10%.
4. Surge protection:50-75W: 4/6KV, 100W and above: 6/15KV.
5. Protection level: IP67.
6. SCP/OTP/OVP/UVP protection.
7. Life time>50,000 hrs.And 5 years warranty.

MAL

European Standard outdoor road lighting LED Driver series

PRODUCT FEATURES

CE / CB / CCC / SAA / UL / FCC / RoHS

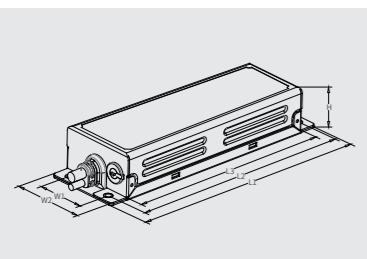

1. Input: W: 120-277V H: Voltage 200-277V.
2. Output: 32-58V, constant power 38-58V.
3. Efficiency up to 91%/High PF≥0.9/ THD≤10%@ Low THD interference.
4. Surge protection:4/6KV 6/15KV.
5. Protection level: IP67.
6. SCP/OVP/OCP protection.
7. Life time>50,000 hrs.And 5 years warranty

MCC

Mini built-in plastic housing waterproof LED Driver

PRODUCT FEATURES

1. Rated input voltage:100-240V.
2. Efficiency up to 86%/High PF>0.95/THD<10%.
3. Surge protection:2KV.
4. Protection level: IP65.
5. SCP/OVP/OCP protection.
6. Life time>50,000 hrs.And 5 years warranty.

MCK

Universal Non-Isolated IP42 Built-in Dali Dimming LED Driver Series

PRODUCT FEATURES

1. Rated input voltage:120-277Vac
2. Output voltage:180-260Vdc,constant power voltage range@200-260V.
3. Efficiency up to 95%/High PF≥0.95/THD≤10%@230VAC Low THD interference.
4. Surge protection:6KV/10KV.
5. Protection level: IP42.
6. SCP/OTP/OVP protection.
7. Life time>50,000 hrs.And 5 years warranty.

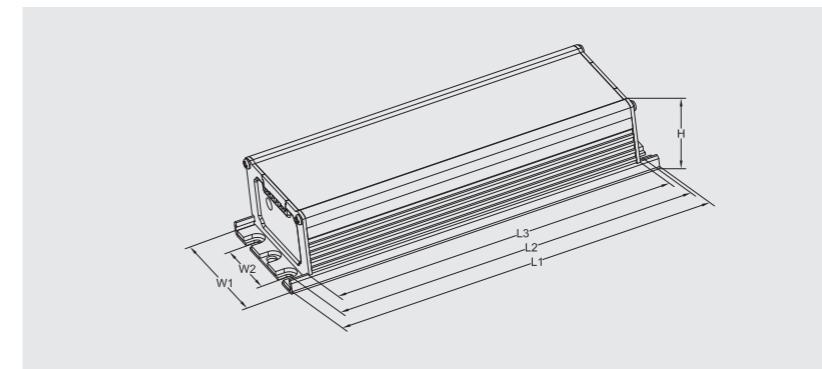

Type A adjustable potentiometer version

Type S three in one dimming version

Type X programming auxiliary output version

Type C+X : (two-color temperature dimming and tone adjustment power

Type DX : DALI2.0+auxiliary source

Type A : adjustable potentiometer version

Type S : three in one dimming version

Type X: programming auxiliary output

Protection Level **IP42**

CE / SAA / UL / FCC / cULus / CLASS P

PXC

European Standard Non-isolated Offline Programming
Waterproof LED Driver

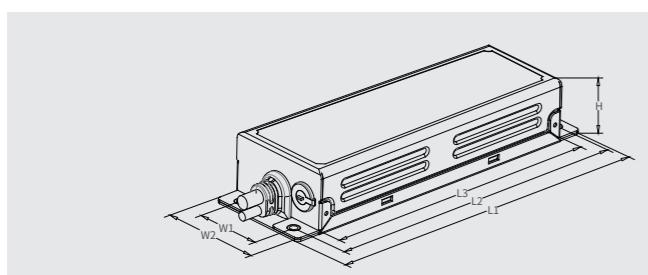

CE / CB / CCC / SAA

PRODUCT FEATURES

1. Input: Rated input voltage 200~277V
2. Output: 180-260V, constant power voltage 200-260V.
3. Efficiency up to 95%/High PF≥0.95/THD≤7%@ Low THD interference.
4. Surge protection:6/10KV.
5. Protection level: IP65.
6. SCP/OTP/OVP/UVP protection.
7. Life time>50,000 hrs.And 5 years warranty

MXG (400-750W)

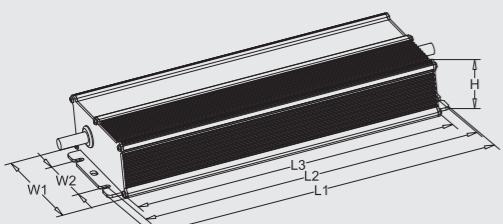

Universal ultra-high power outdoor waterproof LED driver

PRODUCT FEATURES

CB / CCC / CE / UL / SAA / UL / FC / CLASS P / ETL / RoHS

1. Rated input voltage:120-277V.
2. Provide standard output voltage version:25-56Vdc,Constant power@46-56Vdc.
3. compatible with DALI 2.0 fuction module, NTC function optional, and conventional outlet and built-in dimmer two configurations are optional.
4. Efficiency up to 96%/High PF≥0.97/THD≤7%.
5. Surge protection:6/15KV.
6. Protection level: IP67.
7. SCP/OTP/OVP/OCP/UVP protection.
8. Life time>70,000 hrs.And 5 years warranty.

PLS

Universal non-isolated ultra high power outdoor waterproof LED driver series

PRODUCT FEATURES

CE / CCC / SAA / EK / UL / FCC / CLASS P

1. Rate input voltage : W version:120-277Vac; V version: 220-480Vac .
2. Output voltage:180-260Vdc,constant power voltage range@200-260V.
3. Efficiency up to 97.5%/High PF \geqslant 0.97/THD \leqslant 10%@230VAC Low THD interference.
4. Surge protection:6/15KV.
5. Protection level: IP67.
6. SCP/OTP/OVP/UVP protection.
7. Life time>50,000 hrs.And 5 years warranty.

Type J: programmable network port version

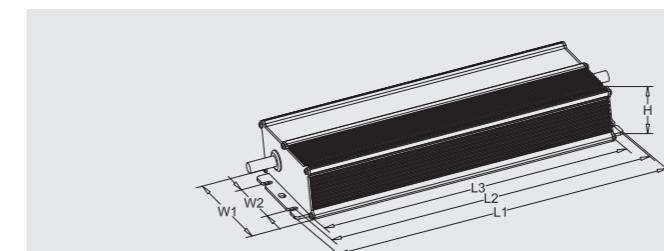

Type X: programming auxiliary output version

Type T: NTC external over temperature protection version

PXL

Universal Non-isolated double-color temperature dimming UFO LED Driver series

PRODUCT FEATURES

/ / / / / / /

1. Rated input voltage: 200-277V.
2. 180-260V high output voltage, constant and adjustable power within the range of 200-260V output voltage .
3. Efficiency up to 95%/High PF ≥ 0.95/THD ≤ 10%.
4. Surge protection: 4/4KV.
5. Protection level: IP65.
6. SCP/OTP/OVP/UVP protection.
7. Life time > 70,000 hrs. And 5 years warranty.

Type PF: programmable with NFC version

Type X: programming auxiliary output version

TypeX: NFC and programming auxiliary output version

DX type: DALI dimming + auxiliary source

Type C+X: (two-color temperature dimming and tone adjustment power)

SBS

Industrial explosion-proof LED driver

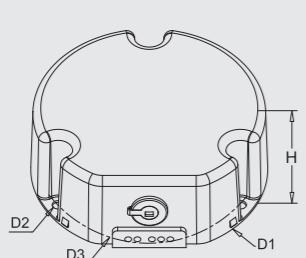

CE / CCC / 符合EX II 2G EX mb IIC GB

PRODUCT FEATURES

1. Rated input voltage:100-277Vac.
2. Output voltage:20-38V/32-58V,constant power voltage:32-38V/42-58V.
3. Meet explosion-proof industry 5-6 series@6V or 10-12 series@3V LED chips usage.
4. High efficiency up to 90%/Power factor 0.95/THD<10%.
5. Surge protection:4KV/6KV.
6. Protection level: IP65.
7. SCP/OTP/OVP/UVP protection function.
8. Life time>50,000 hrs.And 5 years warranty.

RAB

AC200-240V rainproof constant voltage LED driver series

PRODUCT FEATURES

1. Rated input Voltage:200-240Vac(Input voltage range:176-264V).
2. 12V 24V、36/49 Constant voltage output.
3. Efficiency up to 91%/THD<10% EN61000-3-2 CLASS A /Type G:PF≥0.98.
4. Surge protection:4/4KV.
5. Rainproof structure.
6. SCP/OTP/OVP/UVP protection.
7. Life time>30,000 hrs.And 3 years warranty.

SPD

Surge protector device series

PRODUCT FEATURES

1. Max working voltage:305V, Rated working voltage:24V.
2. Max working current:40A.
3. Surge protection:10KV.
4. Protection leve: IP65

Protection Level **IP65**

Cable CCC 1.0MM² 300/500V 105°C

Size 37*42*34mm

LSP10

Surge protector device series

PRODUCT FEATURES

1. Input voltage: 100-277V.
2. Norminal discharge current: (IN) 5KV, 8/20μS.
3. Max. discharge current: (IN) 10KV, 8/20μS.
4. Comply with EN61643-11 standard.
5. Surge Protection: 10KV.

DL-LSP10-PY DL-LSP10-PR DL-LSP10-SR DL-LSP10-SY

Protection Level **IP67**

LSP20

Surge protector device series

PRODUCT FEATURES

1. Input voltage: 100-277V.
2. Norminal discharge current: (IN) 10KV, 8/20μS.
3. Max. discharge current: (IN) 20KV, 8/20μS
4. Comply with EN61643-11 standard
5. Surge Protection: 20KV

DL-LSP20-PY DL-LSP20-PR DL-LSP20-SR DL-LSP20-SY

Protection Level **IP67**

Programming device

1. Intelligent programming accessories USB
2. USB power supply
3. Used with DONE programmer software

Handheld NFC programmer

1. USB power supply
2. integrated NFC module
3. Used with DONE programmer software

Q & A

INPUT VOLTAGE RANGE

When the user sees that the labeled input voltage range on the power supply is 85-265VAC, the actual input voltage is 100-240VAC. When the safety certification is conducted, the so-called strict $\pm 10\%$ test (IEC60950 strict +6%-10%) will be carried out, so there will be no problem in the use of the power supply drive within the voltage range defined in the specification. The voltage range indicated on the power supply is to meet safety specifications and to ensure proper use of the power supply.

POWER FACTOR

Power Factor Correction for improve the led driver ratio of effective Power and apparent Power at the input end. For products which without PFC, the power factor is only 0.4~0.6 at the input end, models which with active PFC , PF can be more than 0.95. The correlation is as follows:

Apparent power = input voltage x input current (VA)

Effective power = input voltage x input current x power factor (PF)

From the viewpoint of environmental, electric power company must produce more than the apparent power, so that their generating sets can supply to market demands stable, and the actual use of power is the effective power. If the power factor is 0.5, it means that the generator set should produce more than 2VA power, can supply 1W power safety.and its energy efficiency is poor. But if the power factor was improved to 0.95, the generating set of the electric power company need produces power more than 1.06VA, the demand for supply 1W power will be enough, and the energy efficiency is better.

SURGE CURRENT

The switching power supply at the instant of the input power transmission will be a brief (1 / 2-1 power cycle, ex: 60Hz power supply 1 / 120-1 / 60 seconds) of high current (about 20-60A according to the product design, please refer to the product acknowledgment) at the moment of power transmission of the input power supply. After the product is started, the normal current input will be restored, and it will appear at the moment of power transmission at the input power supply every time. This is a normal phenomenon and will not cause the damage of power supply . However, it is not recommended to turn on / off the power supply continuously. In addition, it should be noted that if more than one power supply device is used to start up at the same time, it may cause the protection switch of system distribution to jump off. It is recommended to delay starting up among more than one power supply device, or to use the remote control function of the power product to delay starting up the product sequence.

OUTPUT VOLTAGE ACCURACY

Output voltage accuracy refers to the difference between the actual output voltage and the rated output voltage. This error is the superposition value of line stability and load stability. Normally this parameter at $\pm 1\%$ line stability is the percentage of the output voltage that deviates from the rated voltage when the input voltage varies between the maximum and minimum allowable range. Load stability is the percentage of the output voltage that deviates from the rated voltage when the output load current varies between the maximum and minimum allowable range.

Efficiency: The ratio of total output power to active input power, expressed as a percentage. That is, efficiency = output power/input power *100%.

Rated power: refers to the maximum output power of the power supply (voltage V times current A).

Electromagnetic compatibility (EMC) : the ability of a device or system to operate as required in its electromagnetic environment without producing intolerable EMI to any device in its environment.

EMC includes EMI(electromagnetic interference) and EMS(electromagnetic tolerance). The so-called EMI electromagnetic interference refers to the harmful energy transmitted or radiated by the switching power supply. And EMS refers to the ability of the switching power supply to be unaffected by the surrounding electromagnetic environment in the process of performing its due functions.

Ripple: as the dc stable power supply is generally formed by the ac power supply through rectifying and voltage stabilizing links, it is inevitable that there are more or less ac components in the dc stable power. The ac component superimposed on the dc stable power is called ripple.

Output ripple and noise: the amplitude of the output ac voltage from the switching power supply within a specified bandwidth, usually expressed as a millivolt level peak-to-peak or RMS value.

Total Harmonic Distortion is refers to the signal source input, the output signal (harmonic and its frequency doubling component) than the input signal of the additional harmonic component, usually expressed as a percentage. Generally speaking, the total harmonic distortion of this frequency of 1000Hz is the smallest, so many products take the distortion of this frequency as its index. So the test for total harmonic distortion is 1000Hz sound, and the smaller the better.

Overshoot and undershoot: Overshoot is when the first peak or valley value exceeds the set voltage -- the highest voltage for the rising edge and the lowest voltage for the falling edge. Undershoot is the next valley or peak. Excessive overshoot can cause the protective diode to work, leading to premature failure. Excessive undershoot can cause false clock or data errors.

Working environment temperature switch power supply can be reasonable electrical indicators and stability of the working temperature range. Unless specified otherwise, do not assume that the switching power supply can output full power throughout the temperature range, nor that the switching power supply can maintain the same electrical specifications throughout the operating temperature range.

Pulse Width Modulation (PWM) : a method of voltage regulation used in switching power supplies by simply changing the period and duty cycle of the pulse train.
