Connection technology • Distribution terminals

distributor, 27x88x31mm, 10-30V DC, 4x M8 4pin, M12 12pin, IP67, Polyamide PA,
With LED display, 1.5A

including 2x Screw plug

The wiring of sensors and actors is considerably more comfortable with our sensor distribution box. The individual devices are connected with the distributor via an M8 or M12 cable that is pre-assembled on both sides. By means of the trunk line the effort for laying and wiring the cables can be reduced significantly. The operating mode display provides information about the sensors operating mode (operating voltage, switching state). Thus, troubleshooting is simpler, as an overview about the functioning of the connected periphery is directly given.
