Line for camera lighting in flash mode to OC53 with internal flash controller, 0.6m, M8 socket 4-pin straight, M8 connector 4-pin straight, 4-wire

For flash operation on OC53 with internal flash controller

ipf cable sockets are mainly used to establish the electrical connection of sensors. Their properties are characterized by the robust design, in highest protection classes (IP67 | IP68 | IP69K) and on request with a 360° shielding. With the properties: bus-compatible, drag chain and robot-compatible, oil-resistant, chemical-resistant, welding spark-resistant, their detergent-resistant or resistance to high-pressure and steam jet cleaning, the extended temperature range up to +230°C, the quick-connection technology or special data transmission properties, the cable sockets meet all requirements of automation technology.
