

Safety control unit module

SB4 Module 4COP

- Sensor module
- 4 sensor channels
- Single module for safety thru-beam sensors SLA12 and SLA29 and for 2 channel safety devices (emergency off)
- Micro-Controller controls
- Operating mode can be selected by means of DIP switches

Safety control unit module

Dimensions

Technical Data

Release date: 2023-02-15 Date of issue: 2023-02-15 Filename: 182561_eng.pdf

General specifications

Operating mode	ODER-Function
----------------	---------------

Functional safety related parameters

Safety Integrity Level (SIL)	SIL 3
------------------------------	-------

Performance level (PL)	PL e
------------------------	------

Category	Cat. 4
----------	--------

Mission Time (T_M)	20 a
------------------------	------

Type	4
------	---

Indicators/operating means

Function indicator	LED yellow (4x): indicator lamp channel 1 ... 4
--------------------	---

PEPPERL+FUCHS

Technical Data

Stability alarm indicator	LED yellow flashing: Indicator lamp channel 1 ... 4	
Control elements	DIP switch	
Electrical specifications		
Operating voltage	U_B	24 V DC $\pm 20\%$, via SB4 Housing
Input		
Activation current	approx. 7 mA	
Conformity		
Functional safety	ISO 13849-1 ; EN 61508 part1-4	
Product standard	EN 61496-1	
Approvals and certificates		
CE conformity	CE	
UL approval	cULus	
TÜV approval	TÜV	
Ambient conditions		
Ambient temperature	0 ... 50 °C (32 ... 122 °F)	
Storage temperature	-20 ... 70 °C (-4 ... 158 °F)	
Mechanical specifications		
Degree of protection	IP20	
Connection	screw terminals , lead cross section 0.2 ... 2 mm ²	
Material		
Housing	Polyamide (PA)	
Mass	approx. 150 g	

Connection

Terminal	Function	Channel assignment
1	Receiver 2 input	Input
2	Receiver 2 +U	Channel 2
3	Transmitter 2 +U	
4	Transmitter 2 output	Output
5	Receiver 1 input	Input
6	Receiver 1 +U	Channel 1
7	Transmitter 1 +U	
8	Transmitter 1 output	Output
9	Transmitter 3 output	Output
10	Transmitter 3 +U	Channel 3
11	Receiver 3 +U	
12	Receiver 3 input	Input
13	Transmitter 4 output	Output
14	Transmitter 4 +U	Channel 4
15	Receiver 4 +U	
16	Receiver 4 input	Input

Connection example
(LSS = transmitter of light barrier;
LSE = receiver of light barrier)

This module can only be operated within an evaluation device of the SafeBox SB4 type.

The SafeBox instruction manual should be observed.

Function

The 4-channel sensor card module SB4-4COP makes it possible to connect light barriers or light grids or contact safety sensors in a one-channel version. Also, it contains the microcontroller control of the SafeBox.

This module is only contained once in a SafeBox SB4 and has to be mounted on slot 2. The module has a plug-in jumper. If the system contains additional assemblies, then this plug-in jumper has to be connected to the last slot.

When the system is switched on, the software determines whether a light barrier or a contact safety sensor is switched on at a channel and monitors its presence during operation.

Contact safety sensors, which are connected to the SafeBox, must work according to the normally closed principle. An open contact indicates "safe state".

The channels 1 and 2 as well as 3 and 4 can be combined via an OR function when using light barriers.

When using this function, it must be ensured that the effectiveness of the fusing is maintained. This must be checked on installation and commissioning.

Danger!

Operating modes

The assembly has 4 DIP switches for selecting the OR-operation of neighbouring channels (1 OR 2 and 3 OR 4). For selecting functions, 2 selector switches must always be actuated. The functions are only effective if light barriers are connected.

Position of the DIP switches

Switch	Position	Operation type
1 and 3	OFF	No OR-operation channel 1 and 2
	ON	OR-operation channel 1 and 2
2 and 4	OFF	No OR-operation channel 3 and 4
	ON	OR-operation channel 3 and 4

Displays

For each channel, there is a yellow LED on the front panel of the module.

Display	LED	Meaning
R1 - R4	yellow	<p>Status of light barrier 1 ... 4</p> <p>Off: light beam interrupted On: light beam released</p> <p>Flashing: light beam released, function reserve fallen short of (frequency approx. 2.5 Hz)</p> <p>Flashing fast: error (frequency approx. 5 Hz)</p>
