

## Model number

**VAZ-IM1-90°-BOLT-S**

Right-angled actuator for AS-Interface safety switches

## Features

- Rubber-mounted actuator for radii > 300 mm

## Function

The angled actuator VAZ-IM1-90°-BOLT-S is intended for use on sliding doors or swivel doors with door radius greater than 300 mm. The actuator is suitable for a maximum tensile force of 1500 N. The Niro safety screws, which are included in the scope of supply, can be screwed in with a normal tool and prevent unscrewing.

## Dimensions

## Technical data

### Mechanical specifications

Material	stainless steel
Mounting screw	stainless steel
Tension force	≤ 1500 N
door radius	$r \geq 300 \text{ mm}$
caster	5 mm

### General information

Scope of delivery	1 right-angled actuator, with rubber grommet; 2 safety screws, stainless steel M4 x 14
