

Termination Board

HiCTB16-TRI-DIISD-EL-PL

- System board for Schneider Electric, Tricon series by Triconex
- TAN48 approval
- For 64-channel (32+32) DI card 3564
- For 16 modules
- Recommended module: HiC2822 (DI)
- 24 V DC supply
- Hazardous area: pluggable screw terminals, blue
- Non-hazardous area: ELCO socket, 56-pin

Function

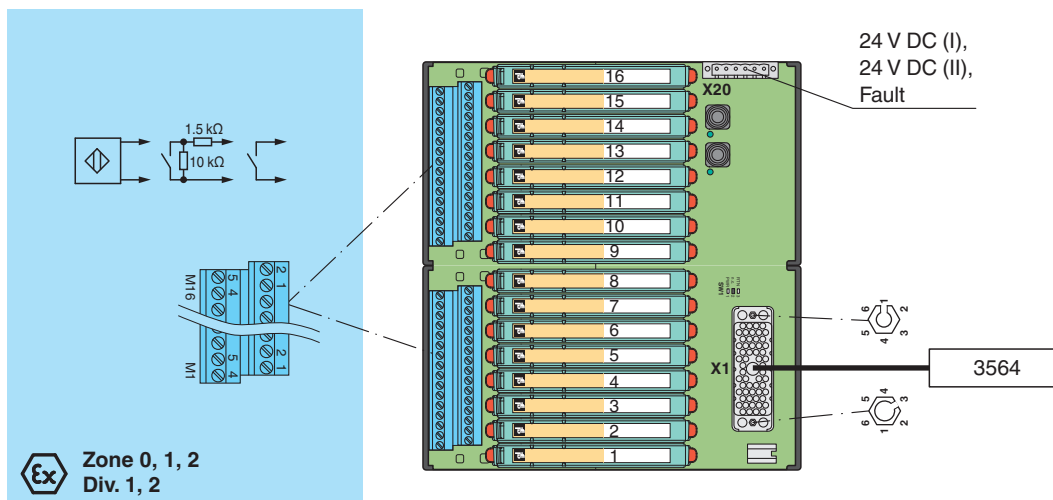

The function of the termination board and the connector pinout is exactly fitted to the requirements of Triconex system. The termination board has a fault bus (Fault) that is available at the redundant terminals. Power supply faults and module faults are indicated via this fault bus. The fault signals of several termination boards can be connected together and can be monitored by an optional fault indication board. The fault signals are then available to the control system as a volt-free contact. The termination board is supplied with a robust plastic housing. This design permits the fast and reliable installation on 35 mm DIN mounting rail according to EN 60715 in the switch cabinet.

Application

Triconex card Tricon:

- Termination board 1 and cable 1: channel 1 to 32
- Termination board 2 and cable 2: channel 33 to 64
