

# Mounting set MH-BT-F07-M6

- Simple mounting
- Conforming to standards
- Adjustable in height
- Adjustable shaft extension

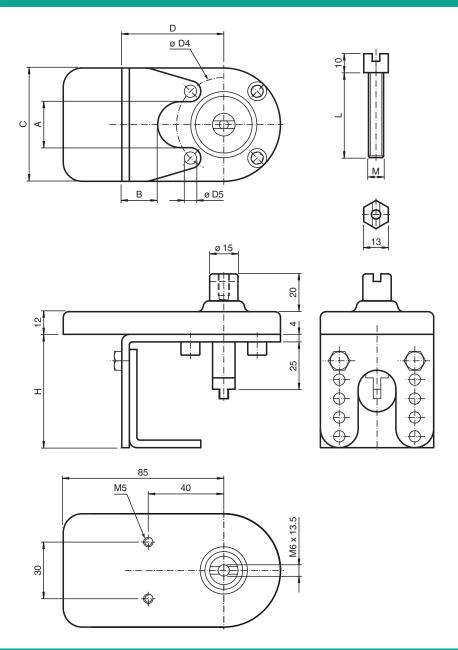

Adjustable assembly set for size F07 manual operated valves according to ISO5211-DIN3337

### **Function**

Assembly set with switch plate for mounting of inductive valve sensors on manual operated valves acc. to ISO5211-DIN3337. The assembly set includes a 2-parts mounting bracket with switch plate, a driver stem and a lock nut.

Mounting set MH-BT-F07-M6

**Mounting** 

#### Installation instructions

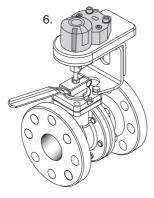

- 1. Screw the included locking nut on the attachment. Then screw the attachment into the central tap hole of the manual valve.
- 2. Assemble the mounting bracket base on the manual valve.

- 3. Attach the upper part of the mounting bracket with the sensor plate to the previously assembled base. The bore holes allow a rough height adjustment.
- 4. Fasten the upper part by means of the included screws and the serrated lock washers.
- 5. Adjust the height of the attachment. The shaft in the upper part has to fit into the groove of the attachment. Fix this position by means of the locking nut.

6. Install the actuator (puck) on top of the shaft and the valve sensor on the sensor plate.

Finally perform a mechanical check of the assembly and a functional check of the position feedback.
