

AS-Interface gateway VBG-CCL-K20-D-BV

- Gateway compliant with AS-Interface specification 3.0
- Fault diagnosis via LEDs and graphic display
- Easy commissioning by graphic display
- AS-Interface monitor read via display
- Earth fault detection
- AS-Interface noise detection

CC-Link gateway

Function

The VBG-CCL-K20-D-BV is a CC-Link Gateway with an integrated AS-Interface master in accordance with AS-Interface Specification 3.0 in IP20. The design is especially suitable for use in the switch cabinet. There are 7 LEDs on the front panel, showing the current status of the AS-Interface line. In the case of the AS-Interface Gateway with graphical display, the AS-Interface circuit can be placed in service and the test of the connected periphery can be kept entirely separate from the commissioning of the CC-Link and the programming.
