
# Termination Board

## HiDTB08-YC3-RRB-KS-CC-AM16-Y1

- System board for Yokogawa CENTUM VP
- For 16-channel AI/AO card AAI841
- For 8 modules
- Recommended modules: HiD2030 (AI), HiD2038 (AO)
- 24 V DC supply
- Hazardous area: spring terminals, blue
- Non-hazardous area: Yokogawa system connector, 40-pin

## Function

The function of the termination board and the connector pin assignment is exactly fitted to the requirements of the Yokogawa Centum VP system.
The signal is output to the process control system via the system connector.
Information about a missing supply voltage of the isolators is available for the system as a volt-free contact.
Wiring faults from the field side will be reported via the same relay contact, if this function is supported by the isolators.
The termination board has a robust plastic housing.
The termination board is mounted in the switch cabinet on a 35 mm DIN mounting rail according to EN 60175.

## Application

Assembly of the termination board:
- Plug-in position 1 to 4: AI modules
- Plug-in position 5 to 8: AO modules
