Digital Input

LB1001A

- 2 channels
- Dry contact or NAMUR inputs
- Installation in Zone 2 or safe area
- Galvanic isolation between channels and the bus
- Positive or negative logic selectable
- Simulation mode for service operations (forcing)
- Line fault detection (LFD)
- Permanently self-monitoring
- Module can be exchanged under voltage

Function

The device accepts up to 2 digital input signals of NAMUR sensors or mechanical contacts from the field.
Open or short circuit line fault alarms are detected.
The inputs are galvanically isolated from each other, from the bus and the power supply (EN 60079-11).
