

## Inductive sensor

### NRN15-18GM40-E2-IO-C-V1

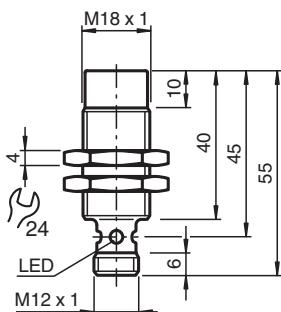

- 15 mm non-flush
- Reduction factor = 1
- Magnetic field resistant
- Weld Immune
- IO-Link interface for service and process data
- Switch point mode or window mode can be set
- Switching function, stability alarm and pulse extension can be set

#### Function

Reduction factor 1 sensors reliably detect different metals with the same switch state. The integrated IO-Link interface enables clear identification of the sensor and diagnosis of the sensor condition. When using the sensor, parameters and operating modes can be optimally configured specifically for the intended application. In addition to setting the switching function and a pulse extension, the user can select either switch point mode or window mode in combination with a stability alarm. In switch point mode, the stability alarm signals the detection of an object in the area between the assured operating distance and operating distance  $s_n$ . In window mode, it signals the detection of an object below the window between operating distance  $s_n$  and the nearest operating distance. A stability alarm is displayed to the user via a flashing LED and process data.

#### Dimensions

#### Technical Data

Release date: 2024-06-05 Date of issue: 2024-06-05 Filename: 306533-0007\_eng.pdf

##### General specifications

|                             |   |                         |
|-----------------------------|---|-------------------------|
| Switching function          | Normally open/closed (NO/NC) programmable |                         |
| Output type                 | PNP                                       |                         |
| Rated operating distance    | $s_n$                                     | 15 mm (factory setting) |
| Near operating distance     | 12 mm (can be activated by software)      |                         |
| Installation                | non-flush                                 |                         |
| Output polarity             | DC  |                         |
| Assured operating distance  | $s_a$                                     | 0 ... 12.15 mm          |
| Reduction factor $r_{AI}$   | 1   |                         |
| Reduction factor $r_{Cu}$   | 1   |                         |
| Reduction factor $r_{304}$  | 1   |                         |
| Reduction factor $r_{St37}$ | 1   |                         |
| Output type                 | 3-wire                                    |                         |

##### Nominal ratings

|                   |       |                |
|-------------------|-------|----------------|
| Operating voltage | $U_B$ | 10 ... 30 V DC |
|-------------------|-------|----------------|

## Connection

## Connection Assignment

Wire colors in accordance with EN 60947-5-2

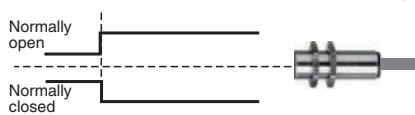

|   |    |         |
|---|----|---------|
| 1 | BN | (brown) |
| 2 | WH | (white) |
| 3 | BU | (blue)  |
| 4 | BK | (black) |

## Function Principle

### Switching output modes

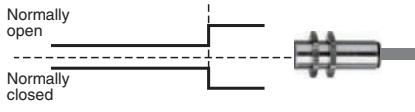

Switch point mode at rated operating distance  $s_n$

Switch point 2 SP 2 (rated operating distance  $s_n$ )

Switch point mode with near operating distance

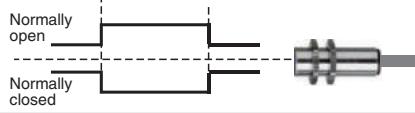

Switch point 1 SP1 (near operating distance)

Window mode

Switch point 2 SP 2 (rated operating distance  $s_n$ )

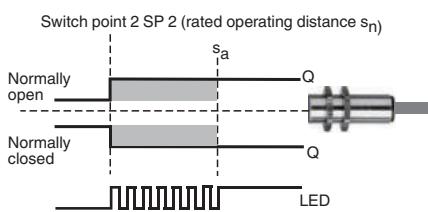

Switch point 1 SP1 (near operating distance)

## Function Principle

### Stability alarm

Switch point mode with stability alarm (factory default)

Window mode with stability alarm

Switch point 2 SP 2 (rated operating distance  $s_n$ )
