

## Retroreflective sensor

ML100-54-F/95/103

- Miniature design
- Easy to use
- Very bright, highly visible light spot
- Full metal thread mounting
- Clearly visible LEDs for Power ON, switching state and weak signal indication
- Not sensitive to ambient light
- Optimized for small distances to any reflector
- Mounting optical reflective films down to a distance of 20 mm possible

Retroreflective sensor with polarization filter, plastic housing, 3 m detection range, red light, sensitivity adjuster, light/dark on, DC version, PNP output, M8 plug

### Function

The optical sensors of this series are suitable for both standard and demanding applications. The series features a miniature housing design, two M3 metal-threaded mounting holes and a highly visible LED status indicator. Each device is equipped with a sensitivity adjuster and a light-on/dark-on changeover switch for increased flexibility. A wide variety of versions are available in both infrared light and red light with PowerBeam for easy alignment. Special versions with BlueBeam are suitable for challenging applications like those in the solar and battery industries.
