## Detailed technical data

### Safety-related parameters

|                                                          |                                                         |
|----------------------------------------------------------|---------------------------------------------------------|
| <b>MTTF<sub>D</sub> (mean time to dangerous failure)</b> | 333 years (SN-29500-1 based on IEC 61709) <sup>1)</sup> |
|----------------------------------------------------------|---------------------------------------------------------|

<sup>1)</sup> This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40 °C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

### Performance

|                                 |                                     |
|---------------------------------|-------------------------------------|
| <b>Pulses per revolution</b>    | 5,000                               |
| <b>Measuring step</b>           | 90°, electric/pulses per revolution |
| <b>Measuring step deviation</b> | ± 25° electrical                    |
| <b>Duty cycle</b>               | ≤ 0.5 ± 15 %                        |

### Interfaces

|                                       |                      |
|---------------------------------------|----------------------|
| <b>Communication interface</b>        | Incremental          |
| <b>Communication Interface detail</b> | HTL / Push pull      |
| <b>Number of signal channels</b>      | 6-channel            |
| <b>Initialization time</b>            | < 50 ms              |
| <b>Output frequency</b>               | ≤ 300 kHz            |
| <b>Load current</b>                   | ≤ 40 mA, per channel |
| <b>Operating current</b>              | 50 mA (without load) |
| <b>Power consumption</b>              | ≤ 0.85 W             |

### Electronics

|                                    |                                             |
|------------------------------------|---------------------------------------------|
| <b>Connection type</b>             | Cable, 8-wire, radial, 1.5 m                |
| <b>Supply voltage</b>              | 5 ... 30 V                                  |
| <b>Reference signal, position</b>  | 90°, electric, logically gated with A and B |
| <b>Reverse polarity protection</b> | ✓                                           |

|                                         |   |
|-----------------------------------------|---|
| Short-circuit protection of the outputs | ✓ |

## Mechanics

|                                |                                                                    |
|--------------------------------|--------------------------------------------------------------------|
| Mechanical design              | Through hollow shaft                                               |
| Shaft diameter                 | 65 mmFront clamp <sup>1)</sup>                                     |
| Flange type / stator coupling  | 1-sided stator coupling with slot available for order as accessory |
| Weight                         | 1,400 g                                                            |
| Shaft material                 | Stainless steel UNI EN 4305                                        |
| Flange material                | Aluminum                                                           |
| Housing material               | ZAMAC die cast                                                     |
| Material, cable                | PUR                                                                |
| Shaft sealing ring material    | FKM70                                                              |
| Material, cable gland          | Nickel plated brass                                                |
| Start up torque                | 40 Ncm (+20 °C)                                                    |
| Operating torque               | 35 Ncm (+20 °C)                                                    |
| Permissible shaft loading      | 200 N (radial)<br>120 N (axial)                                    |
| Operating speed                | ≤ 2,000 min <sup>-1</sup>                                          |
| Moment of inertia of the rotor | 2,640 gcm <sup>2</sup>                                             |
| Bearing lifetime               | 10 <sup>9</sup> revolutions                                        |

<sup>1)</sup> Collets (shaft reducer) available as accessories to reduce shaft sizes under 65 mm.

## Ambient data

|                               |                                            |
|-------------------------------|--------------------------------------------|
| EMC                           | According to EN 61000-4-2 and EN 61000-4-4 |
| Enclosure rating              | IP65 (IEC 60529)                           |
| Permissible relative humidity | 98 % (Condensation not permitted)          |
| Operating temperature range   | -25 °C ... +85 °C                          |
| Storage temperature range     | -25 °C ... +85 °C, without package         |
| Resistance to shocks          | 250 g, 6 ms (EN 60068-2-27)                |
| Resistance to vibration       | 10 g, 5 Hz ... 2,000 Hz (EN 60068-2-6)     |

## SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
