

Vision Sensor

B50S011

Part Number

- Image processing functions
- MultiCore technology

The vision sensor weQubeVision is based on the wenglor MultiCore technology. The functions region of interest and tracking ensure optimal object detection. The following image processing modules are available: Dimensional accuracy check, sorting procedures, presence control, object counting, position output, pixel counting, filter options, and statistics evaluation. Thanks to the integrated color image chip, all image processing functions are also available for remote applications.
