

Pressure Sensor

FM5P201

Part Number

InoxSens

- **Analog output: 4...20 mA**
- **Compact, laser-welded stainless steel 316L housing**
- **Very fast response time of < 1 s**
- **Very low weight at 13 g (without cable)**
- **Very small format at Ø 14 mm, SW13**

The weFlux²micro miniature pressure sensor with analog output is distinguished by its space-saving design and low weight. This enables precise pressure measurements in confined installation spaces and on moving plant components such as robot arms. The short response time (<1 ms) allows the sensor to be implemented in quick pressure measurement applications – for example, when monitoring pressure curves in hydraulic systems.
