

Pressure Sensor with IO-Link

FX9P002

Part Number

weFlux² InoxSens

- Compact, laser-welded stainless steel 316L housing
- Individual parameter configuration via IO-Link 1.1
- Quick sensor replacement thanks to data storage

weFlux² pressure sensors precisely measure the relative pressure of any desired media. Depending on application requirements, either two switching outputs or one switching output and one analog output can be selected to output measured values. Furthermore, weFlux² pressure sensors offer new dimensions in individual parameter configurability. Sensor parameters, filter and output functions as well as the unit of measurement of the measured values (bar, PSI or Pascal) can be adjusted as needed.
