

# Protective Screen for ZLSS003

## ZLSE007

Part Number

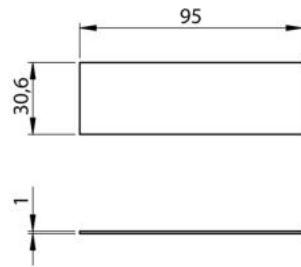

### Technical Data

#### Mechanical Data

Material	Glass
Coated Optics	yes
Packaging unit	2 Pieces

- Antireflection coated in broad ranges with wavelengths from 400 to 700 nm
- Glass surface ideal for welding applications
- Protective screen for ZLS003 protective housing for welding applications
- Suitable for sensors with red or blue light

The protective screen made of glass is ideal for welding applications in combination with the ZLS003 protective housing. Use of the protective screen results in a Z-offset within the sensor's measuring range. The amount of offset depends on the sensor model. Furthermore, linearity deviation is influenced by up to 0.1%.

All dimensions in mm (1 mm = 0.03937 Inch)
