Application

ÖLFLEX® CLASSIC 110 SY cables are VDE approved power and control cables for occasional flexible use and fixed installation for medium mechanical load conditions. They are also suitable for use in dry, damp or wet areas. Outdoor use: If using outdoors, observe the indicated temperature range and use with UV protection. They are largely resistant to acids, alkalis and certain oils at room temperature.

They are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

The steel wire braid is used for the mechanical protection of the cable.

Application range:

As power and connecting cable in plant engineering and construction, industrial machinery and in heating and air-conditioning systems as well as in areas with high mechanical stress.
