<b>ÖLFLEX® FD 855 P 12 G 0,75 mm²</b>	valid from : 09.06.2008

## Application

ÖLFLEX® FD 855 P cables are especially high flexible oil resistant control- and supply cables special for use in power chains, automatic manipulators, in permanently moved machine parts, also for long travel lengths and high speeds. They are for use in dry, damp and wet rooms and outside as well. Usage on motor drum guidance or under a strain of more than 15 N / mm² is not allowed.

ÖLFLEX® FD 855 P cables are increased oil resistant and at room temperature generally resistant against acids and caustic solutions. The outer sheath of Polyurethane is resistant against high mechanical abuse, particularly to abrasion cuts, microbe-proof and hydrolysis resistant. The used materials are halogen-free.
